Contested question q
opinion graph G in $\mathbb{B}_c^d$
ℓ_A
a
ℓ_B
top fork by $s(f) = \mathrm{rel}(q,a)^\alpha W(A,B)$
Qwen plain
Draft 1
$y_1 \sim P_M(\cdot \mid q)$
PLAIN ANSWER DRAFT
tends toward the majority view
Qwen persona
Draft 2
$y_2 \sim P_M(\cdot \mid q, \ell_A)$
injected as conditioning priors
SUBGROUP PERSPECTIVE A
explicitly capture minority views
Qwen persona
Draft 3
$y_3 \sim P_M(\cdot \mid q, \ell_B)$
SUBGROUP PERSPECTIVE B
explicitly capture minority views
Qwen merger
Constraint check
$W_m \geq W_d$
$P_m \geq P_d$
Accepted merge
Rejected concatenate instead
Preserves minority cluster coverage.
